Integrated eLearning Hosted Application Service Knowledge Class

KnowledgeClass

Learn in a Classroom Environment

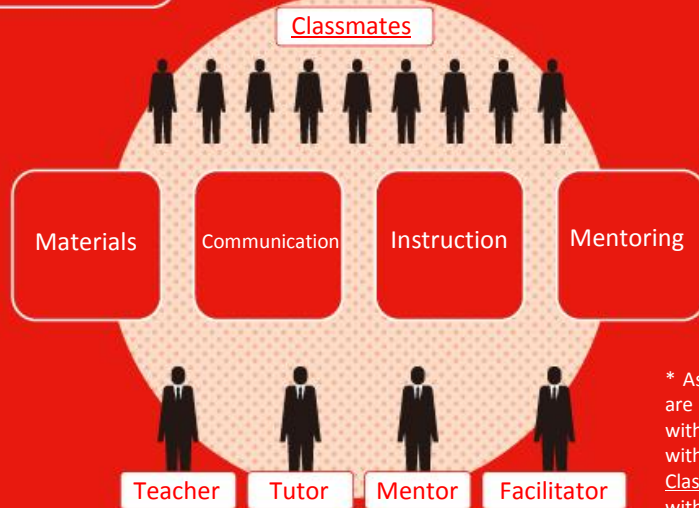

Whether it be an elementary school, university, or a company training program, there exist real classrooms where instructors conduct their lectures and activities. In such an environment, instructors are not just simply carrying out one-way lectures. Rather, there exists a variety of interaction between instructors and learners and among learners as well. Instructors pass out homework, call on learners, and at times also reproach learners. Learners talk with one another about non-curricular topics and carry out extra-curricular activities together.

Knowledge Class, provides a classroom environment which allows eLearning to take one step closer to "real learning" like mentioned above. This social layer goes beyond just delivering content, because it allows schools and company training programs to provide the place and opportunity for learners to expand their knowledge through classmate communication and broaden their overall network of valuable colleagues and friends.

What is Knowledge Class?

Knowledge Class
Hosted Application Service

Combined with delivering learning materials, Knowledge Class makes it possible for various communication, fine-tuned instruction, and organized mentoring.

* As a hosted application service, there are no installation worries associated with servers or middleware. Just access with your web browser, create the Classrooms you need, and get started with your eLearning plan!

Main Points

- As an application service, risks associated with installation and system maintenance are absent.
- Various instructional tools for teachers/tutors/mentors/facilitators, and communication tools for learners are provided.
- Mentoring tools are available for nurturing motivation and supporting steady study progression.
- Multi-Operating System (Windows/Mac) Support and Multi-Web Browser (Internet Explorer/Firefox/Safari/Chrome) Support.

Experience a shift from standard eLearning to Classroom-based eLearning

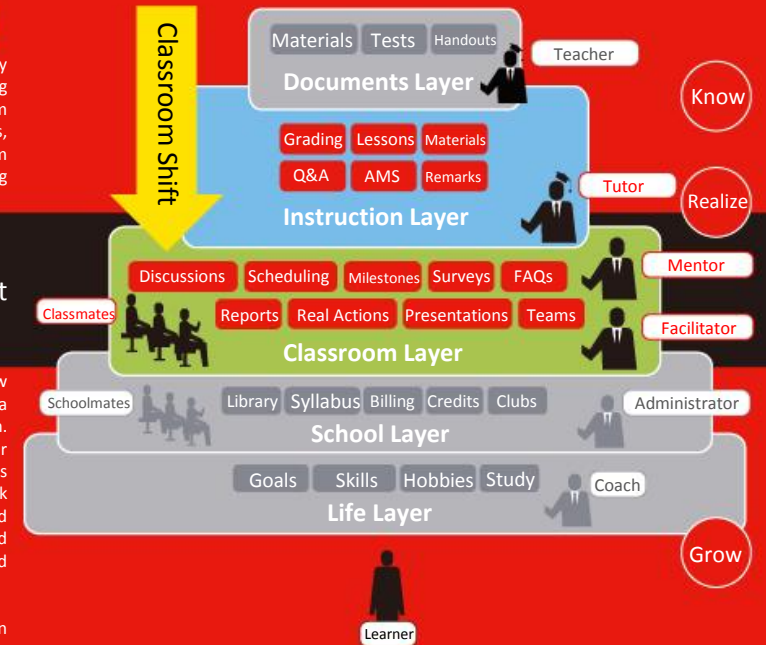

Knowledge Class (Hosted)

Up until now, eLearning has primarily focused on a "Documents Layer" containing materials, tests, and other curriculum content. However, with Knowledge Class, the focus has been shifted to a "classroom education environment," containing enhanced Instruction features,

Classroom Education Environment

various communication channels, and new collaboration methods. The result is a communication centric eLearning solution. Learners sharing the same goals can gather virtually inside Classrooms to access instructional materials, receive feedback and remarks from instructors, discuss and collaborate with each other, and expand their network of learning comrades and friends.

* The Documents Layer is available when combining Knowledge Deli with Knowledge Class.

Major Characteristics

Communication

Learn together with classmates to explore and expand on concepts touched on in curriculum materials. Discover new aspects about the topic at hand and motivate/be motivated by others to learn even more. Also, freely socialize with fellow learners, not limited to discussion about curriculum content topics.

Instruction

It is important for tutors to evaluate learner work and carefully listen and reply to curriculum related questions. Moreover, it is essential to monitor each learner's progress and provide further commentary and reference material as necessary. Knowledge Class makes all of this possible.

Mentoring

Mentors and facilitators must recognize learners' strengths and weaknesses, and keep an eye on overall curriculum progress. Based on each learner's current condition, praising and/or encouraging them is essential for sustained motivation and steady progression. Again, Knowledge Class makes all of this possible.

Knowledge Class Features

On top of receiving guidance and support from instructors, learners can also utilize Classroom features to work together to learn more effectively.

Classroom Communication

- Create User Profile
- Make Friends List
- Message Friends
- View Classmates
- Whisper on Mini Blog
- Question Classmates
- Discuss on Discussion Board
- Present Work to Classmates

Instruction

- Question Instructors
- Access FAQs
- Submit Reports
- View Announcements
- Submit Surveys

* Also Available in Knowledge Deli

Mentoring

- Monitor Learner Progress
- Answer Learner Questions
- Encourage Learners
- AMS (Automatic Mentoring Scenario)

* Also Available in Knowledge Deli

Accessibility

- Multiple Web Browsers
- Firefox / Safari / Chrome / Internet Explorer
- Macintosh Support
